DETAILED ACTION

Applicant's amendment of claim 23 and applicants sequence listing, in the paper of 8/25/2008, is acknowledged. Claims 1-23, 26, 27 are pending and at issue.

Applicant's election without traverse of Group I, claims 1-23, 26 and 27, in the paper of 2/11/2008.

Upon further consideration it has been determined that the following further restriction is appropriate. Any inconvenience to applicant is apologized for.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1. In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Species Group 1: Those variant archaeal DNA polymerases having an amino acid sequence of wildtype polymerases selected from the group consisting of *Thermococcus gorgonarius* (Tgo-Pol), *Thermococcus litoralis* (Tli-Pol), *Thermococcus* sp. 9°N-7 (9°N-7-Pol), *Desulfurococcus* strain Tok (DTok-Pol), *Pyrobaculum islandicum* (Pis-Pol), *Archaeoglobus fulgidus* (Afu-Pol), *Sulfolobus acidocaldarius* (Sac-Pol), *Sulfurisphaera ohwakuensis* (Soh-Pol), *Sulfolobus*

solfatarius (Sso-Pol), *Pyrodictium occultum* (Poc-Pol) and *Aeropyrum pernix* (Ape-Pol).

Species Group 2: Those amino acid modifications corresponding to Y7, Y37, V93, I114 or P115 of SEQ ID NO: 2 or Y8, Y38, V94, I115 or P116 of SEQ ID NO: 1.

Applicant is required, in reply to this action, to elect a single species from Species Group 1 and a single species from Species Group 2, to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

The following claim(s) are generic: 1-6, 14, 15, 23, 26, 27.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: Each of the wildtype polymerases are distinct, independent polymerases that are structurally independent and distinct proteins. Each of the mutation positions listed in Species Group 2, are distinct and independent amino acid positions that are structurally distinct and independent from each other.

As previously stated, U.S. Patent No. 5,827,716 teaches a modified *Pyrococcus furiosus* DNA polymerase in which the wild-type amino acid sequence is modified in the amino-terminal portion of the polymerase, specifically an alanine is inserted into position 2 of the polymerase (see paragraph 27). Thus, the shared technical feature of the groups is not a "special technical feature", unity of invention between the groups does not exist.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
